New, more efficient pump for the electrical dispensing unit ergodisc

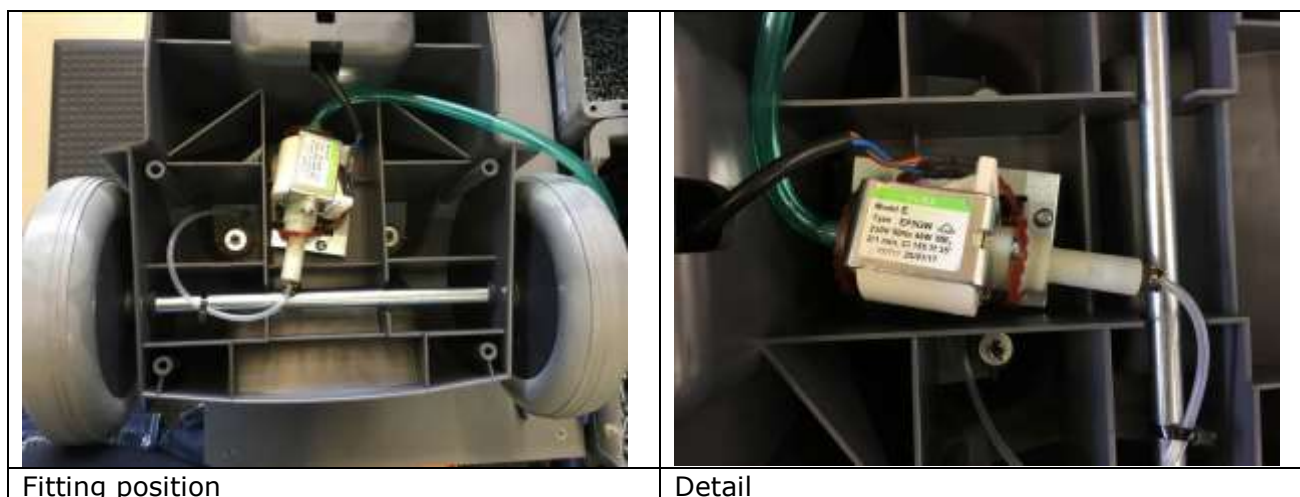

Recurring problems in the field with the pump of the electrical dispensing unit in interaction with the product Jontec spray have led us to introduce a new pump. This one has about 30% more power and accordingly a higher operating pressure.

Prior tests have shown that with this new pump a better spraying result with less dripping can be reached.

The pump is backwards compatible and can simply be affixed to the existing bracket. But as the anti-rotation protection cannot be mounted, the pump is no longer secured against twisting, but it doesn't matter in this case.

The two pumps can be distinguished from each other by the color (old: blue, new: white)

The old pump remains in our product range as it is still used as a spare part for the combimat 300.

Description	Material number	Remarks
Pump 230V 50Hz 48W	4132663 (4630/010)	New spare part number
Pump 230V 50Hz 32W kpl.	4110140 (4630/006)	Existing spare part number
