Subassembly	Tank / Back side

### Modification back side tank and fixation IntelliDose

On various walk behind machines modifications on the back side of the tank has been done. The main reason for this modification was the limited accessibility of the battery disconnecting plug when an IntelliDose unit is mounted. In addition a modification on the tank socket outlet of the draining hose was done with the focus on a limitation of defective draining hoses.

The following elements have been modified:

- The charging cable fixation is no longer in the centre but new on the right side.
- The battery disconnecting plug will be connected to the machine beneath the charging cable holder. This makes the battery disconnecting plug easily accessible and allows a simple disconnection of the battery from the electronic for any charging process (see operating manual/instructions of use).
- The IntelliDose base plate is already mounted ex Münchwilen. Only the cover with the additional tray has to be removed to be able to insert and connect the device.
- The clamps for the drain hoses are now both on the left side. In addition the tank socket outlet was prolonged to grant a proper fixation of the wastewater hose and so limitations of damages near the outlet.

## Service Information

- |   |   |
|---|---|
| <input type="checkbox"/> Check parts on stock                 | <input type="checkbox"/> Return defective parts to Münchwilen               |
| <input type="checkbox"/> Proactive exchange recommended       | <input checked="" type="checkbox"/> NO proactive exchange recommended       |
| <input type="checkbox"/> Modification is backwards compatible | <input type="checkbox"/> Modification is NOT backwards compatible           |
| <input type="checkbox"/> Update/modify machines in the field  | <input type="checkbox"/> Entitled to warranty                               |
| <input type="checkbox"/> Dispose/recycle defective parts      | <input checked="" type="checkbox"/> Parts are available ex stock Münchwilen |
| <input checked="" type="checkbox"/> Others                    |   |

With this modification the mounting of the IntelliDose has been simplified. The base plate and the connecting cable are already mounted ex Münchwilen. Mounting instructions (old and new) will be provided with each IntelliDose set.

All walk behind models will be modified in due course. We will inform with a GTS Newsletter.

The tank as a complete unit is backward compatible. The new synthetic parts like charging cable fixation etc. are not backward compatible and suit therefore only on new tanks.

All adjustments including order numbers of the spare parts will be listed in the spare part catalogue.
