Machine	TASKI vac 44
Subassembly	Suction Aggregate

Electronic

For enhancement as well as for recertification purposes of the TASKI vac 44 our supplier has built in an additional electronic. The main purpose of the electronic is supporting the interference suppression and the reduction of activation peaks transmitted to the local power supply.

On previous models the user had the possibility to activate the required turbine with the relevant switch. This functionality will now be routed by the electronic. In case one of the turbines fails the electronic routes automatically to the other still functioning turbine.

The functionality of the device is not affected by the implementation of the electronic.

Description	Material number	Remarks
Electronic incl wires	4130489 (30018-33)	New spare part number

Service Information

- | | |
|--|---|
| ☐ Check parts on stock | ☐ Return defective parts to Münchwilen |
