Tank Set, TASKI swingo XP

In the first version of the TASKI Swingo XP it was unfortunately not possible to empty the tank completely. Due to this situation a modification on the tank was carried out, which has been implemented already. This modification enables the customer to empty the tank nearly to the full extent.

Part	Old	New	Status
Tank Set		4127885 (18603-31)	available

⚠ CAUTION

When exchanging a tank the specification plate on the existing tank needs to be removed carefully and adhered to the new tank.

Service

As exchanging a tank is causing an extensive amount of labour (app. 4 hrs) we do not recommend a pre-active action on client machines, as long as it is not necessary. The Tank Set includes a complete tank, a tank lid, a mounting bracket, an adjustment block, hose material and various gaskets.

The Tank Set will not be refunded under warranty.
