New blades for TASKI swingo XP

In the course of harmonisation of the squeegees and blades for some machines, these parts will be adjusted. As extensive tests did not show any major disadvantages, the 5mm thick blades of the TASKI swingo XP will be changed to 4mm. Because of this change TASKI swingo 1650, TASKI swingo 1250, TASKI swingo 2500 and TASKI swingo XP can be operated with the same blades in the future.

Description	Old	New	Remarks
Squeegee Assy	4123630 (18600-18)	4123630 (18600-18)	The new squeegee will be delivered with blades 4mm
Blade (back side)	4126451 (12200-42)	4127877 (12200-60)	Blade back side changes from 5mm to 4mm
Blade (front side)	4124565 (12200-43)	4124565 (12200-43)	
Blade clamping Insert R.H.	4126524 (18600-80)	4127875 (18603-26)	
Blade Clamping Insert L.H.	4126522 (18600-79)	4127876 (18603-27)

⚠ CAUTION

For the first series of TASKI swingo XP, the 5mm blades have to be used like before. If you change the blade clamping, 4mm blades can be used in future.

Service

We recommend equipping your service with 5mm blades as well as with 4mm blades. Furthermore the shape of the squeegee has changed at its edges. The new shape prevents the blades from tearing off its socket.

Production

TASKI swingo XP
