TASKI ergodisc water tank Art.-No. 8504390

For the **water tank ergodisc** some modifications were made. On the locking part, 2 bolts (A) and 2 pedestals (B) are integrated in the tank body.

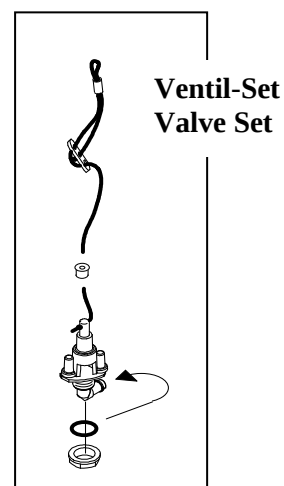

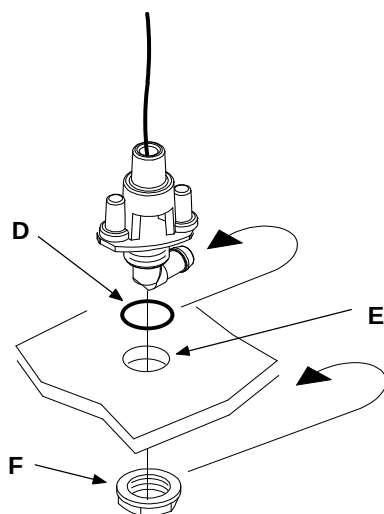

These two changes are representative for the „new tank“ identification. As generally known for these article-category, there are no serial numbers available!

The most important change of the valve is the improved assembling.

- The complete pre-assembled valve including gasket (D) has to be mounted through the bottom hole (E)
- The valve is fixed by the hexagon nut (F) from the bottom
- **New spare parts:**

Order-No.	Art.-No	Bezeichnung	Designation
4126698	80116-34	Ventilset (mit Dichtung u. Mutter)	Valve Set (with Gasket and Nut)
4126666	80116-32	Sechskantmutter M 20x1,5	Hexagon Nut M 20x1,5
4126676	80116-33	Dichtung	Gasket

Production

The delivery of the new water tank Art.-No. 8504390 will start in January 2006.

Service

The new valve set 4126698 (80116-34) can not be assembled in old tanks.

The previous valve set 4122310 (80116-30) can not be assembled in new tanks!
