Squeegees for Combimates and Swingo

New bumper wheels

The bumper wheels on the most of our squeegees will be replaced by a new wheel soon. This modification is necessary for the new Swingo line (750/1250), because they get a new weight built in; please refer to the corresponding spare parts catalogue.

The following version has to be compared:

Service

- Please check the compatibility according to the arrows in the drawing.
- The sustaining disc (19512-23) in the old version is not available anymore. You will get automatically the Set 19512-23 (containing new sustaining disc (17606-74) and waved washer (1790/15) according to drawing on the right side).
- The two waved washers (1790/88) are not anymore required in the new composition, these is also not necessary for the combination 17501-59 with Set 19512-23.

The new parts are from now on available ex. Münchwilen.
