To: NSS Distributors & Service Centers
Date: April 14, 2005
Product: Battery Powered Wrangler and Charger Series
Subject: Field Install Key Switch Kit

PRODUCT IMPROVEMENT

Field install key switch kits are available for several popular machines. The key switch kits are designed to be field installed with minimal difficulty. This kit should be offered to all customers that can benefit from the added security that a key switch offers.

The key switch will allow the customer to limit the use of the equipment to authorized and trained personnel only. In addition, it offers a level of security against unauthorized usage or movement of the machine and will help ensure that battery powered equipment will receive a complete charge cycle before the machine is used. Operation of the machines by unauthorized or untrained operators may cause preventable damage that ultimately increases the operating cost to the customer.

Please order spare keys (part number listed below) for your stock to assure your customers are not out-of-service due to lost or missing keys.

Kit Part #	Part Description	Used on
6495599	Key Switch Kit	Charger 2025 DB
