

PULLMAN-HOLT

The NEW E1500 Extractor

The two/2-stage tangential discharge by-pass type vacuum motors deliver the ultimate extraction power – **94 CFM and 140 inches of water lift**. A powerful **100 p.s.i. demand pump** delivers an even deep down cleaning spray. It's large capacity polyethylene tanks, **17-gallon solution and 15-gallon recovery**, allow for less frequent draining and refilling. **Translucent drain hose** indicates the level of the solution tank, prevents spills and allows for easy draining into floor drains, pails, slop sinks and commodes. A **Stainless Steel solution tank lid** provides superior air-seal and durability. **Two front-mounted 4 inch swivel casters** and **two large 12 inch rear wheels** provides excellent maneuverability and stability, particularly when transporting up and down stairs. Covering large areas is easy with the reach of a **25-foot power cord** and a stationary handle with **15-foot vacuum and solution hoses**. Includes **Steel Wand with grip handle** and **12-inch wide single jet**. One-year manufacturer's limited warranty. Shpg. Wt. 110 lbs.
